

6 (a-3) a stator supporter;

7 (a-4) a plurality of terminals made of metal plate and disposed around said
8 bearing supporter;

9 (a-5) a metal tip extended outside of said motor base;

10 (b) a stator mounted to said stator supporter;

11 (c) a rotor supported by the bearing which is supported by said bearing
12 supporter; and

13 (d) a metal cover, of which end is fixed to said metal tip, for covering said rotor,

14 wherein the base has a substantially flat side extending from at least one of said
15 plurality of terminals to the metal tip.

ABSTRACT:

Please replace the Abstract with the new Abstract which is attached as a separate sheet.
